

CONTACT CLEANING SYSTEM

KEY FEATURES

- Cleans the surface from dust & particles
- Can be retrofitted on all Premium model

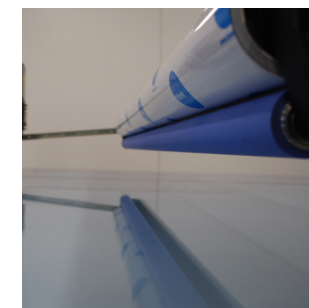

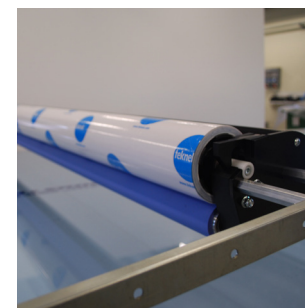

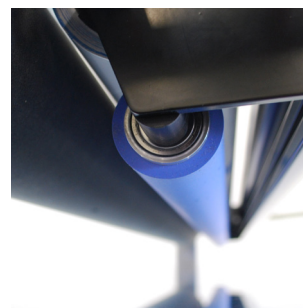

A PERMANENTLY FIXED ACCESSORY that cleans any flat surface. The contact cleaning system is a machine mounted device that picks up particles down to 1 micron (and below). The contact cleaning system can be used to clean any flat surface and will pick up dry, unattached particles without damaging the surface or leaving anything behind. It will pick up dust, lint, hair, glass, metal skin and plastic particles. It has a built in cleaning function that continuously refreshes the roller for next application.

Can be mounted to all ROLLROLLER Premium 170 models, with a width of 1700mm.

Contact cleaning system includes one cleaning adhesive roll with 60 sheets of cleaning paper (part no 10404).

MODEL	DIMENSION	PART NO.
Contact cleaning system	1 500 mm / 59 in.	70863
1 box of 4 adhesive rolls	1 500mm / 59 in.	71132
